

CompTIA Linux+ Online (CST C191)

General Information

This course is offered through Coastline College's Military Program, a proud member of the Service Members Opportunity Colleges (SOC) network. Active Service members and their families in all branches of the U.S. Armed Forces are eligible to apply and register. Go to <http://military.coastline.edu/page.cfm?LinkID=1426> for more information.

Course Description

Linux+ is CompTIA's vendor neutral entry level certification. Like most of CompTIA's certifications (A+, Net+, etc) Linux+ has become the entry level must-have certification. You will explore the history, various releases of Linux, and perform Linux installation. You will compare and contrast Desktop managers, traverse the Linux file system, explore the wonders of Vi--scripts and the Command Line. Before it is over, you will document, archive, back up, and secure the workstation. ADVISORY: CST C116 or CST C117 or C128. This course may be taken four times. Graded or Pass/No Pass option.

3.0 Credits/SH

Course Core requisites: NONE

Instructor

Paul McManus
