

## Introduction to Dreamweaver Online (CS53.11A)

---

### General information

[Adobe Systems](#) offers business, creative, and mobile software solutions to help people and organizations engage with ideas and information. Its products include Acrobat (PDFs), Flash, Photoshop, Illustrator, Premiere, Fireworks and InDesign. Its many customers include enterprises, knowledge workers, creatives, designers, OEM partners, and developers worldwide. PDFs are extraordinarily widely used. More than a billion Flash technology-enabled devices have shipped worldwide; Flash Player is installed on over 98% of Internet-enabled desktops; and approximately 75% of online videos worldwide are viewed using Flash technology, making Flash the #1 format for video on the web. Adobe Dreamweaver software has a customer installed base of more than 5 million. More than 90% of creative professionals have Adobe Photoshop software on their desktops. Knowledge and skills with Adobe products are in wide demand.

[Adobe Dreamweaver CS5.5](#) software is the industry's leading application for developing websites and web applications. Using its powerful coding environment or standard-setting visual interface, designers and developers at all levels can create engaging and dynamic websites for multiple devices.

### Course Description

This course uses Adobe Dreamweaver to create professional websites. Previous knowledge of HTML (Hypertext Markup Language), basic CSS (Cascading Style Sheets) site structure, and site uploading to an ISP (Internet Service Provider) is essential. The emphasis will be on learning the beginning skills such as tools, panels and commands, new site creation, editing and maintenance of an existing site, Cascading Style Sheets, image, text and PDF (Portable Document Format) insertion, divs and tables, tracing, templates, libraries, forms, and behaviors.

## Instructor

Jeff Diamond is an Adobe Certified Dreamweaver instructor and has been a Santa Rosa Junior College instructor since 1998.
